

Appl. No.: 10/737,040
Amdt. dated 06/01/2006
Reply to Office action of January 3, 2006

Amendments to the Specification:

Please amend the Abstract as follows:

The present invention concerns a [A] mechanism for adjusting the angle of an auxiliary support mounted on an auxiliary support mechanism. The mechanism may have a first member having a plurality of surfaces mounted on the end of an auxiliary support mechanism.
The mechanism may also have a second member having a plurality of surfaces slideably enveloping said first member. The mechanism may still further have a third member movably connected to the auxiliary support mechanism as well as a spring member. is described which uses a bar that travels in a pair of slots at slightly different angles.

On page 2, please add a new paragraph after paragraph 0037 and before the heading “Detailed Description of the Invention” as follows:

FIG. 32 is a perspective view of a shelf adjustment mechanism with an auxiliary shelf for an adjustable support for keyboards and the like embodying the present invention.
